

# X-RAYS - WHY DO WE TAKE THEM?

There's much more than meets the eye when it comes to your oral health.

Dental X-rays show us problems that may not be detectable during a standard visual exam.

With these images, we can provide more accurate diagnoses and create more effective treatment plans.

## We Use X-rays to...

- Reveal cavities
- Locate impacted teeth (like wisdom teeth)
- Monitor development of permanent teeth in children
- See abscesses, cysts, and possible tumors
- Detect bone damage or loss
